(54) Title: **THROMBOPOIETIN PROTEINS WITH IMPROVED PROPERTIES**

(57) Abstract: The invention concerns human thrombopoietin and in particular modified forms of thrombopoietin (TPO) with im-
proved properties. The improved proteins contain amino acid substitutions at specific positions within the TPO molecule. The
invention provides modified TPO molecules, preferably fusion proteins comprising immunoglobulin constant regions and modified
human TPO, with improved biological activity concomitant with reduced immunogenic potential in the protein. The improved pro-
teins are intended for therapeutic use in the treatment of diseases in humans.
